About BESTIND

We, **BESTIND** from 2008 are a leading firm affianced in offering ERP and Management Software. Our provided range consists of Customer Relationship Management Service, HR Payroll Software Solutions, and ERP Software for all businesses. The software provided by us is user-friendly and helps in generating simple interfaces for the better understanding of the needs of various industries. In addition to this, offered software is applauded in the market owing to their client-focused approach, easy installation, low complexity, excellent module division, and perfect execution and with extraordinary Service and Support. We are on a mission to exceed your expectations and form a long term, mutually beneficial relationship with you.

What is Lead Management?

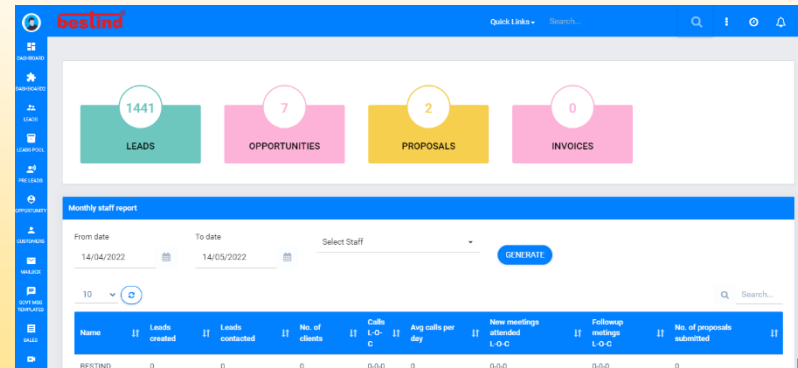

BESTIND LMS gathers the leads from all your sources saved in the software. It is an essential program for the businesses to manage the leads coming from different websites or walk ins. Later those leads can be processed by calling or sending emails or messages. It also gives you the complete reports of status wise leads, source wise leads etc. The software is useful for Big Business Houses, Universities, Colleges and other businesses. Lead management is a systematic process in which incoming leads are qualified, analysed, and nurtured so that they can be converted into new business opportunities. In a typical sales process, leads from multiple channels enter your lead management system, and the sales-ready leads are converted into deals. You need to have a lead management platform in place if you want to make the most of prospects who are interested in your product or service.
