What is Neo Library?

BESTIND NEO LMS gives the freedom to the librarians to manage their library efficiently. It is very easy to manage books with their titles, ISBN, Accession Nos, Authors, Subjects, Publishers etc. It also prints the barcode of the books to search the books immediately and issue it. It calculates fine on the books. Books lost / Tear management is included. Neo LMS comes with the frontend website to display all the available books. Students can search from the available books and can suggest for the new books. A library management system is software that is designed to manage all the functions of a library. It helps librarian to maintain the database of new books and the books that are borrowed by members along with their due dates. This system completely automates all your library's activities. The best way to maintain, organize, and handle countless books systematically is to implement a library management system software. A library management system is used to maintain library records. It tracks the records of the number of books in the library, you can find books in an instant, issue/reissue books quickly, and manage all the data efficiently and orderly using this system.
